LIFT STATIONS

CI BioTrap

d-Limonene floating degreaser and odor control for lift stations.

Professional Grade Specialty Chemicals

An all-natural floating degreaser and odor-control liquid built on 100% d-Limonene from orange-peel extract. **CI BioTrap** is non-emulsifying — it floats and coats lift-station walls as the water level rises and falls, stripping grease at the waterline and holding an odor barrier. A red dye signals when it's time to re-dose, and it won't disrupt downstream biology.

FLOATING GREASE STRIP

Coats walls at the fluctuating waterline as levels move.

CONTINUOUS ODOR BARRIER

Floating layer blocks and neutralizes wet-well odor.

RED-DYE INDICATOR

Colour fades to show when to re-dose.

APPLICATION & DOSING

Dose	≈ ½ gal per sq ft of water surface
Circular wells	Surface area = $3.1415 \times \text{radius}^2$
Action	Floats and treats as the level fluctuates
Re-dose	When the red colour fades

PROGRAM FIT

Form	Liquid (100% d-Limonene)
Program role	Lift-station degreaser / odor
Best for	Wet wells, waterline grease
Biology	Fully compatible

USED IN

Lift stations

Wet wells

Collection points

Grease collects at the waterline, so that's where BioTrap works — floating, coating, and holding the line on odor.

Made in Canada · For industrial use only
